CORPORATE OVERVIEW

*A&E, woman-owned, 8(a), small business
ISO 9001 Certified*

Since our start in 2004, T3W remains strongly committed to helping our clients develop strategies to optimize their data, space, resources and programs. We are data / quality managers, programmers, planners, environmental engineers and project managers who collaborate with our clients to produce quality deliverables on time and within budget.

We serve our clients by providing expert support using technology, creativity and our years of experience in technical and business related project management and consulting. With our dedicated staff, our successes come from listening to our clients, embracing innovation and implementing technology solutions for optimizing space and assets, developing geo-enabled tools and ensuring compliance, e.g., environmental, planning, geospatial.

T3W is an equal opportunity employer that screens candidates through a rigorous interview process coupled with our Predictive Index assessment to ensure we offer the “right people for the job.” T3W is an ISO 9001 Certified company and has the ability to perform classified work.

ENVIRONMENTAL SERVICES

T3W's environmental team provides environmental compliance expertise. We assist clients with measuring and reporting environmental program performance; conducting formal audits / evaluations and monitoring implementation of EMS; and developing / reviewing environmental assessment documents and reports to determine compliance with laws, regulations and policy.

We develop and design plans related to hazardous waste/material management that ensures compliance with RCRA; and support environmental programs such as water, air, natural resources, and NEPA. Our team reviews spill contingency plans and logistics for oil and hazardous material spill response kits, and conducts engineering design/analyses for new technologies designed to reduce sources of hazardous waste streams.

Environmental Services

- Air
- Hazardous Materials / Waste
- Application / Tool Development
- Environmental Planning
- RCRA / CERCLA / NEPA
- Assessments
- Natural Resources

Past Performance Solutions:

- Asbestos and Environmental Mapping (GIS)
- Provide Environmental Training
- Environmental Database Design / Administration
- Ensure Compliance with Technical / Regulatory Requirements
- Hazardous Waste Management / Manifestation
- Natural Resource Compliance / Protection
- Research and Provide Innovative Technology Solutions

BUSINESS ENTERPRISE SOLUTIONS

T3W develops enterprise solutions that connect users and departments with data, technology and business processes to create quality and efficiency throughout the organizations. Using data analytics and adhering to the latest security requirements, T3W delivers improved process, planning, application development and systems engineering solutions. We partner with industry to provide this support directly or through independent verification and validation - delivering strategies and tools that enhance missions and address our clients' needs throughout the enterprise.

Business Enterprise Solutions

- Systems Engineering
- Planning
- Application / Tool Development
- Process Improvement
- Cyber Security
- IV&V

Past Performance Solutions:

- Floor Plan & Space Usage
- Network & IT Engineering
- Business Process Analysis
- Enterprise Architecture Designs
- Compliance and Risk Assessment
- STIG management / implementation
- Proven Customized training and implementation plans
- Business Process Analysis

PROGRAM MANAGEMENT

T3W helps clients develop strategic and interim tactical plans to support short and long term goals. Our program management follows acquisition best practices with Requirements, Analysis, Design, Test, Implementation and Operations. This holistic approach enables our Project Leads, Portfolio Managers and Program Managers to collaborate and deliver value through the use of Program of Record Support, Work Breakdown Structures (WBS), Project Schedules, Reports and Documentation and Plans of Action and Milestones (POA&Ms).

Program Management

- Asset Management
- Acquisition Management
- Facilities Data Management
- Utilities Analysis
- Business Case Analysis
- Decision Support Analysis
- Portfolio Management

Past Performance Solutions:

- Comprehensive Inventory Control
- Support of ACAT I – IV Programs
- Public Utilities Commission Support
- Fact-Based Information Presentations
- Analysis and Decision Support
- DOTMLPF Analysis
- Manage Assets

DATA SOLUTIONS

T3W helps our clients retain valued legacy data by integrating it with current data and ensuring it remains usable for the long-term. We create tools to clean and check data quality, apply standards to allow for data sharing across entities, migrate data to current data models, and develop tools that enable in-depth analysis and efficient data collection. As our clients adopt new data solutions within their organizations, we develop customized plans for data maintenance to ensure continued quality, provide user/maintenance training, and create quick reference guides (crib notes) to complement the training.

Management Services

- Integration / Migration
- Standards / Interoperability
- Application / Tool Development
- Development / Implementation
- GIS / CAD / GPS
- Quality Assurance / Control
- Data Management

Past Performance Solutions:

- Manage / Migrate / Standardize Data
- Tools to Support Quality Control
- Develop Regional Data Maintenance / Training Plan
- Develop Policy and User Guides
- Data Gathering & Compliance
- Real Time, Mobile Data Collection Application
- Integrate ESRI and GIS Products
- Data Analytics

T3W APPLICATIONS / TOOLS

T3W develops web and mobile applications that help our clients collect, visualize, store, share and update data – without investing in expensive software and subsequent upgrades.

Users can quickly locate assets on a map (to the building/floor/room) and update data while in the field, reducing the opportunity for data entry errors and lapse in time to report changes. Users can view linked materials while in the field – permits, recent inspections, maintenance manuals, etc. – right on their mobile device.

T3W Applications / Tools

- Multiplatform
- Disconnected / Web
- Cloud
- Field Data Collection
- Time-stamped geo-coded notes/photos/records
- Inventory Management
- Shapefile and Excel view/edit

Past Performance Solutions:

- Air Force Weather
- Navy Facility Asset Management
 - Basic Facility Requirements (BFR)
 - Infrastructure Condition Assessment Program (ICAP)
 - Capital Equipment
 - Space Management
- Naval Base San Diego, Environmental Inspections
- Navy Medical Center, San Diego, Asbestos
- Large Dataset Clean and Migration
- Supply Chain
